Title	Database of Internet educational resources
Resume	Motivated by growing Internet educational resources, librarians of the Radom Pedagogical Library developed database containing links to WWW sites concerning education subjects. Public and local government offices, science institutes, schools, societies, educational companies, and individuals who are willing to share their knowledge, are the creators of the collected sites.
Item	Description
Main Aim & Goals	Catalogue of the education oriented Internet sites has been developed. The sites links has been grouped according to the Universal Decimal Classification (UDC) which groups all disciplines of human knowledge into divisions and subdivisions. The Internet catalogue of <i>educational links</i> applies the UDC and provides its search engine to reach every link in the database. Such structured database is implemented to help in precise searching of the Internet for education concerning sites.
Target group	Concerns all Internet users looking for information in education science field.
Location	Radom, mazowieckie (Poland), http://www.e-baza.bp.radom.pl/
Objectives	
Duration	Continuous

Activities	The database development, data updating.
Results	1214 links grouped in 23 categories and 194 subcategories.
Products	The database available via Internet.
