Duration	1.11. 2008 .– 31. 12. 2009 .
Activities	Carried out training for 72 teachers of vocational and lifelong learning.

Results

Persons participating in the project received extensive training in the field of e-learning which was not limited to the knowledge of the principles of its operation. Participants were trained to create e-learning courses based on their own scenarios and conduct distance learning and conducting on-line mentoring and consultation. They acquired the ability to test the finished multimedia courses and their didactic assessment. The consequence of participation in the project is to improve the skills of communicating on-line and off-line and the use of electronic databases.

Products

e-Learning content in the form of standardized lesson plans for vocational and lifelong learning.
